

DEMONSTRATE

Against the Aggressor Zionist State and Its Criminal Agent **MOSHE DAYAN!**

Monday, April 7, 6:00p.m.

Assemble at the ticket trailer on WESTWOOD BLVD at UCLA and march to PAULEY PAVILION for the picketline. by the Third World Solidarity Committee.

MOSHE DAYAN served as Defense Minister of Israel during the war of 1967 and engineered the Israeli government's attacks on Palestinian refugee camps for many years. He made the ambitions of the Zionist state of Israel very clear when in June 1969 he stated, "Our fathers had reached the frontiers which were recognized in the partition plan. Our generation reached the frontiers of 1949. Now the Six-Day Generation has managed to reach Suez, Jordan and the Golan Heights. This is not the end. After the present cease-fire lines, there will be new ones. They will extend beyond Jordan -perhaps to Lebanon, and perhaps to central Syria as well." Dayan is a world famous spokesman and supporter of Zionist expansion and aggression against the Arab people -particularly the native Palestinian people who were forced from their land and now, living in refugee camps in Lebanon and Syria, are fighting to liberate Palestine from Zionist aggression.

Cal. State LA

FILM & SPEAKERS: Wed., April 2, Noon, King Hall B 2011
"We, the Palestinian People"

Revolutionary Student Brigade

In the late 1800's, millions of Jewish people were murdered in vicious anti-Jewish massacres. The European ruling class was making a desperate attempt to divide the working class in order to turn the anger of the people away from their real oppressors, the capitalists, and re-directed the peoples anger on a convenient scapegoat, the Jews. This was the soil from which grew Zionism. The founder of Zionism, Theodore Herzl, did not set out to organize resistance to this terror campaign, but went around Europe encouraging anti-semitism. He said Jews could not play an equal economic and political role in the countries where they lived because they formed a distinct nation (despite the fact that Jews share only a religion, and have not shared a common language, territory or economic life for thousands of years). The Zionist solution was to segregate Jews in an exclusively "Jewish state". Herzl enlisted the support of many anti-semitic politicians by promising to rid their countries of Jews, and open up Asia to capital investment.

The bloody origin of Israel, aided by British and then U.S. imperialism, was based on the forced displacement of over one million Palestinian people from the land native to them for thousands of years. Palestine has been the traditional home of millions of Palestinian people sharing a common culture, language and economic life. They resisted Zionist colonialization and British control in the 1930's and 1940's, and continue today to wage a just struggle for national liberation, and the establishment of a democratic Palestinian state for all people.

Israel's ruthless and systematic attacks on the Arab and Palestinian people proves who the real terrorists are. Backed economically, politically and militarily by the U.S. government, Israel has launched four wars of aggression against the Arab states. It is the Zionist ruling class and their imperialist backers, not the Jewish people, that the Palestinian people are fighting. Our solidarity with the people of the Middle East in fighting back against our common enemy is a powerful weapon in the struggle to SMASH IMPERIALISM AND ALL REACTION!!

WE WON'T FIGHT IN YOUR IMPERIALIST WARS!

This economy is coming apart at the seams, and it's in deep trouble. Unemployment, inflation, outbacks, and general decay of the system are stepping up and people are getting fed up with it. The rulers in this country, the capitalists, in turn are afraid of this anger and their growing problems at making profits here and around the world, so they're building up for what they hope will be a solution to their problems. "War is what we need to get out of the recession", Elliot Janeway, a top government economist recently noted. Now, the ruling class is telling us to roll up our sleeves, "bite the bullet" and get prepared for hard times and possible war.

Profits to capitalists is like heroin to a junkie -they must constantly get a bigger fix or they'll suffer breakdowns and be in real trouble. The U.S. monopolies must rip more and more profits from the labor and sweat of people in this country, while also continually drive throughout the world for profits, for more territory, more markets, more resources, and places to invest. At the same time, U.S. corporations prop up fascist governments in South Korea, Thailand, Iran, South Africa, etc. to protect their profit and dominate countries all around the world.

Capitalist countries throughout the world are driven by these laws to constantly gain greater profit. The peace that exists between them is only a truce between future conflicts and wars.

Now it is the U.S. and the Soviet Union who are fighting it out to be the "top dog". They are presently contending over the Middle East with its vast oil resources. The ruling class tries to get the American people to support, fight, and die in a war which will only bring increased profit to their millions. If the U.S. military does invade, the Soviet Union could very well retaliate and a new world war could result -a war in which they want us to fight for their stinking profits.

Of course the design of these two imperialist superpowers is one thing, and reality is quite another. When the U.S. tried to put out flames of revolution in Vietnam, it was like putting gasoline on a fire -- it not only didn't stop the fire, it helped spread it. Wars of national liberation have been sparks all around the world in places such as Palestine, Dhofar, Yemen, Angola, Mozambique, Cambodia, etc. where people have won great victories and continue to struggle for revolution and independence from foreign aggression.

And the American people, fed up with the way this whole system works, don't want another war. Vietnam brought it all out. The war showed millions what American imperialism was fighting for -domination and oppression here and abroad. The press and politicians like to say that Vietnam was an unpopular war. It sure as hell was; and the truth came out from thousands of students, GI's and vets, from unemployed, from Black, Latin, Asian and white and the working class.

We won't fight a war for U.S. capitalism to survive. Who the hell wants to fight to keep those old millionaires running the ship. Our war is against monopoly capitalism. This is a popular war, with people all over the world fighting in it, and it is the one that when we win will put an end to the threat of imperialist war forever.

We Won't Fight in Your Imperialist Wars!

We in the Revolutionary Student Brigade, a nationwide organization of students of all nationalities, are working and calling for nationwide demonstrations on April 19 to fight against these threats of war and to take our stand with the struggle of the oppressed people all over the world, both at home and abroad, who are waging just wars of liberation against this imperialist dinosaur. At the same time, we are going to tell the Imperialists that if they go to war with each other, we'll take advantage of the situation to send them all to the bottom of the sea!
